

Energy production and consumption: Inspiring use cases for islands and isolated territories.

Agenda Webinar 1: Energy Production (November 25th at 10.30 CET)

10.30	Welcome and Introduction	Hélène Morin, BDI
10.35	Key answers and lessons learned	Peter Connor, University of Exeter
10.45	Glénan Islands <i>Battery storage optimization for the Smart Grid of Saint Nicolas des Glénan</i>	Joël Nedelec, ENAG
11.00	Guadeloupe Islands <i>Opportunity study for the exploitation of mobile offshore wind energy at Marie-Galante</i>	Félix Gorintin, Farwind
11.15	Island of Molène <i>Techno-economic study for tidal turbine implementation</i>	Nicolas Ruiz, Guinard Energies
11.30	Panel Discussion	Facilitated by Sebastien Dalmas, ICE Project

Agenda Webinar 2: Energy Consumption (December 9th at 10.30 CET)

10.30	Welcome and Introduction	Hélène Morin, BDI
10.35	Key answers and lessons learnt	Konstantinos Chalvatzis, University of East Anglia
10.45	Islands of Sein and Molène <i>Status of electricity consumption and electrical devices, perception of energy.</i>	Gwendal Vonk, SDEF
11.00	Alderney <i>First step in engaging with Alderney residents about the potential for a move to lower carbon energy sources.</i>	Alaister Coffey, University of Exeter
11.15	Ushant <i>Connected objects informing the status of the electrical grid</i>	Gwendal Vonk, SDEF
11.30	Panel Discussion	Facilitated by Sebastien Dalmas, ICE Project
